Radzisz Communications s.c. was established in 1999. From the very beginning we create sophisticated, high-end, internet based solutions and provide outsourcing services - supplying and servicing complex computer systems. Our offer covers:

- Computer Network and System Administration
- Software development
- WWW design and implementation
- Internet hosting
- Software Localization

and follows the concept: “From an idea to the working product”.

Our company employs a team of highly-educated professionals, experienced in developing and maintaining complex systems. We are experts in creating software for both Unix and Windows platform. So far we have been realizing our projects basing on:

- Sun-OS,
- Linux,
- Windows 95/98/NT/200/XP

Among libraries, programmer environments and tools we are using, the most important are:

- Xforms, Mesa, Open GL, Motif.
- OLE, MFC, DDE
- Borland and Microsoft C++
- Java J2EE (Cactus, Xdoclet, Struts, JBoss)
- CORBA (C++, Java)
- PHP

As providers of Computer System Administration Services, we possess the knowledge and experience allowing us to tune our applications, so that they work in a stable and highly-preferred way, even when running on an unstable operating system. We are also experienced in creating and maintaining databases such as Oracle, PostgreSQL, Sybase.

Our software is:

- always supplied in the form of easy to use installer/uninstaller and help files.
- are highly scalable and can be rebuilt and extended due to needs of our customers

- have 1 year guarantee /to be free from defects/

WebPages

Since the Internet became as important as newspapers, company's web side is one of the most important factors in creating customers' opinion. Nowadays WWW must be something more than only the address and company's logo.... If you do not have your own web-site or you wish to redesign your existing one (including interesting materials and your complete offer) you are the most welcome to use our services.

One of our passions is creating interactive WWW pages, which you would be proud of and which would leave your competitors far behind you. We guarantee our products to be unique and cost-efficient.

Among our major products there are:

- MBA – menedżerska baza arkanów (manager's secrets database)
- Leliwa planning database –Internet system for trainings management
- Internet Spy – program which can record all Internet sites which are accessed by a user – compatible with all Internet browser, designed for Windows platform/
- Linux web tools:
 - o Vacation system
 - o SMS mail confirmation
- Active CD-ROM presentations
- Portal „Plastik” – www.plastik.pl
